Bespoke planning and design

*Bespoke LED touchscreens can also be produced based on client needs*

Replacing outdated equipment with the latest technology has enabled our clients to **save 90%** on their energy costs.

90%  
Saved

## 4K LED Touchscreen Walls

**PCL Live can provide clients with 4K touchscreen walls for their offices or working environments.**

**Using equipment from our industry leading partners, we provide more functionality and ease of use to our clients.**

**Conduct meetings, presentations, and hold workshops with more accessibility and collaboration ability than ever before.**

# Live Streaming

PCL Live use the latest 4K Broadcast equipment to deliver unforgettable live events.

From gatherings requiring a small set up, to full productions of live sporting events broadcast worldwide, PCL Live will manage the event, host content through our dedicated web page and can edit a final cut as part of the package.

# Video Production

PCL Live can produce video and visual content for projects and events as well as bespoke graphics and custom banners to bring your vision to life. Having us take care of these technical aspects allows you to focus on the final product.

**PCL Live offer video production and promotional material creation for a wide range of requirements including:**

Internal / external campaigns

Interviews and discussion pieces

Live stream post production

eLearning and training courses

# Digital Signage

PCL Live can provide digital signage and cloud services to allow seamless advertising and content display capability throughout your various locations.

Manage content across multiple sites worldwide, sending specific content to individual or all connected screens linked to the system.

Integrate your whole suite of digital signage, from TVs to room booking panels to guest sign in products.

PCL Live can manage the cloud distribution as well as create the content for display if required.
